this book serves as a guide for pre service teachers wishing to begin formative qualitative research its purpose is to provide pre service and novice teachers with the necessary techniques to solve classroom problems it explains each stage of conducting research starting with writing a problema statement and a research question moving through a literature review and culminating in data analysis with a strong emphasis on practical application the book guides readers in writing objectives constructing conceptual frameworks and formulating conclusions additionally the book supports students with other learning barriers such as writing errors and provides advice for spanish speaking english learners in summary this book helps future language teachers become reflective professionals who use research to bring about changes in their teaching practice and in english language education

this innovative book combines what most books separate research as practical activity and research as intellectual engagement it clarifies and makes explicit the methodological issues that underlie the journey from initial research idea to the finished report and beyond the text moves the researcher logically through the research process and provides insights into methodology through an in depth discussion of methods it presents the research process as an engagement with text this theme moves through the construction of text in the form of data and the deconstruction of text in analysis finally the focus moves to the reconstruction of text through the re presentation of the research in the report following through each of these stages in turn the chapters consider either a practical issue or a group of methods and interrogate the associated methodological concerns in addition the book also addresses the rarely explored issues of the researcher as writer and researcher identity as core elements of the research process the book provides a range of insights and original perspectives these successfully combine practical guidance with the invitation to consider the problematic nature of research as social practice it is an ideal reference for those embarking on research for the first time and provides a new methodological agenda for established researchers
